

DUE DILIGENCE SERVICES

Regulatory Services—US, UK, and EU

toXcel works with legal and accounting groups (either independent or collaborating contractors) to address the following types of issues that arise during a comprehensive due diligence process: Mergers and Acquisitions, where regulatory compliance requirements and vulnerability analysis are key aspects of the due diligence stepwise program.

- Identification and assessment of regulatory vulnerability and emerging regulatory issues.
- Development and introduction of novel products when venture capital sponsors require assessment of supporting scientific study data and related regulatory compliance issues.
- Identification and clarification of technical matters to elucidate critical issues in product development.
- Assessment of product development issues to input into the investment requirements and identify the target end points for consideration of options and further financial positions.
- Provide expert third-party technical support for review of confidential documents for acceptability to relevant regulatory authorities for all aspects of safety and performance evaluations.
- Address co-development strategies to optimise investment potential.
- Evaluation of the scientific validity of available supporting data.

We have experienced regulatory managers, toxicologists, chemists, and other specialists who routinely evaluate data and manage scientific and technical research study programs. We are keenly aware of the parameters that investors consider most critical to be addressed through due diligence to inform the decision-making process.

toXcel has extensive experience in the multidisciplinary aspects of due diligence and has strategically aligned partners for comprehensive execution of critical components. **toXcel** can participate as a technical advisory partner with an existing client team or provide a full operational group.

Please don't hesitate to contact us for further information on the services that we are able to provide in support of due diligence programs.
