

FIFRA WORKSHOPS

CUSTOMIZED FOR YOUR NEEDS

Regulatory Services— US

Do you or a new employee need a working understanding of FIFRA? Are you launching a new product area that requires FIFRA registration? Do you want to educate upper management and control expectations?

toXcel has addressed the above situations by providing customized FIFRA workshops for one or several participants. Working with a single participant or a focused company team virtually or onsite allows us to provide vital instruction and guidance at an optimal pace and discuss in-depth company and product specific regulatory issues and situations.

The goal is to provide a true Workshop – encouraging discussion of your company's product specific issues and situations, regulatory options, and strategies. Discussions can be as detailed as desired and confidential business information can be openly discussed.

Exclusively designed to fit your and your company's strategic objectives, **toXcel** will prepare a one-to-two day course that will provide you with:

- A working understanding of FIFRA (the basics, regulatory actions, data requirements/ options, and post-registration obligations)
- R&D strategy for new product development or enhancement of existing products, and
- Regulatory strategies focused on your current product registrations

For further information, contact Connie Welch-DuJardin at 703-754-0248 extension 8118 or by email at Connie.Welch-DuJardin@toxcel.com.
